IPO Chart: Harry and Judy Movie or Arcade

Input:

- Harry's money ($7)

- Judy's money ($12)

- Movie ticket price ($8)

Process:

1. Compare Harry's money to the ticket price.

2. If Harry ≥ $8 → he can see the movie; otherwise → go to arcade.

3. Compare Judy's money to the ticket price.

4. If Judy ≥ $8 → she can see the movie; otherwise → go to arcade.

Output:

- Harry's activity (movie or arcade)

- Judy's activity (movie or arcade)

Example Output:

- Harry: Arcade

- Judy: Movie
